EXPERIENCE (not comprehensive, see LinkedIn for full history)

MT.JOY

Shift Lead & UX Designer | Part-Time, Seattle | October '23 - present

- Trained up from 0 kitchen experience. Serving high-quality chicken sandwiches to over 100 customers a day, managing kitchen and daily tasks as necessary.
- Consulted UX design with the lead developer of their custom ordering/kitchen app. Contributing to a 50% increase in customer and staff engagement.

BOEING

Product Designer Full-Stack | Full-Time, Bellevue, WA | April '20 - January '22

Microservice Front-End Rework Project

- Directed a project design to unify several disconnect microservice front-ends with a global source reducing developer time by 300%.
- Developed and researched a custom solution using Angular component factory and Gitlab CI/CD data. Paved the way for an Angular framework update strategy.
- Maintained and tested the code for the entire life of the project.

Microservice Full-Stack Web Application Development

- Developed several identity and security web applications to be used in a high-security environment in AngularJS, React, and Java Spring Boot.
- Collaborated with developers from all sectors of the Identity & Security division to develop a strategy for commercial airline clients. Delivered 4 microservice products.
- Coded REST APIs in Java to connect to multiple secure SQL databases.
- Deployed applications to cloud servers, automating deployment with bash scripts, YAML scripts for environment and load balancing.
- Designed fully responsive front-ends, UX testing with real users.

BP3 GLOBAL, CHARTER SPECTRUM

UX Developer | Contract, Remote | August '22 - April '23

- Designed UX prototype wireframes and user-interfaces with live data in AngularJS for large client internal construction application product with over 50+ user flows.
- Strategized outlook with team brainstormed solutions for complex business goals.
- Administered live user tests in collaboration with designers and created user stories.
- Communicated design strategy to client stakeholders and developers to ensure consistent design in the delivered product, Adobe Analytics integration.

WORKBOARD

Automation Test Developer | Contract, Remote | Jan '22 - June '22

- Developed automation scripts in Cypress for testing calendar integration ReactJS front-end on a product with over 10,000+ active users.
- Reported bugs and communicated findings to development team.

EDUCATION

B.S. Computer Science

Biola University | La Mirada, CA
2011 - 2019

Multimedia Design

Moorpark CC | Moorpark, CA
2009 - 2010

CERTIFICATIONS
